This software allows the State of Maryland to share information, manage resources and provide situational awareness of disaster events to all government, private and nonprofit entities. It is used by all State departments and agencies and seven local government agencies, Anne Arundel, Baltimore, Carroll, Harford, and Howard Counties, along with the cities of Annapolis and Baltimore, and the Federal Emergency Management Agency to share information.

No MBE or VSBE goals were established for this contract because it is a sole source proprietary product, and the contract is for access to the platform.

Agency Remarks (cont'd):

The pricing was found to be fair and reasonable by comparing the historical costs to the CPI (Consumer Price Index) over the same period. The year 2022 was 1% lower than 2021 due to a fee reduction caused by the removal of COVID charges. The new contract had a 5% increase for 2023 due to an addition of 250 users and \$2,000 for custom services. Years 2024 and 2025 are set at 1% and 3% increase year over year, which is lower than CPI over the past two years.

DGS OSP Remarks: RETROACTIVE approval requested pursuant to § 11-204(c) State Finance & Procurement Article. DGS OSP has determined that this contract should be treated as voidable rather than void because: (1) all parties have acted in good faith; (2) ratification for the procurement contract would not undermine the purposes of the Procurement Law; and (3) the violation, or series of violations, was insignificant or otherwise did not prevent substantial compliance with the Procurement Law.
